INDEPENDENT AUDITORS' REVIEW REPORT TRANSLATED FROM CHINESE

PWCR22000144

To the Board of Directors and Shareholders of C SUN MFG. LTD.

Introduction

We have reviewed the accompanying consolidated balance sheets of C SUN MFG. LTD. and subsidiaries as at September 30, 2022 and 2021, and the related consolidated statements of comprehensive income for the three-month and nine-month periods then ended, as well as the consolidated statements of changes in equity and of cash flows for the nine-month periods then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 "Interim Financial Reporting" as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the following paragraph, we conducted our reviews in accordance with the Statement of Auditing Standards No. 65 "Review of Financial Information Performed by the Independent Auditor of the Entity" in the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for qualified conclusion

As explained in Note 4(3), the financial statements of certain insignificant consolidated subsidiaries were not reviewed by independent auditors. Those statements reflect total assets of \$730,388 and \$468,316, constituting 8.75% and 6.33% of the consolidated total assets, and total liabilities of \$133,750 and \$58,064, constituting 2.67% and 1.26% of the consolidated total liabilities as at September 30, 2022 and 2021, respectively, and total comprehensive income of \$3,076, (\$6,084), \$10,345 and (\$21,068), constituting 1.13%, (3.92%), 1.56% and (3.73%) of the consolidated total comprehensive income for the

three-month and nine-month periods then ended, respectively. Furthermore, as described in Note 6(7), investments accounted for using equity method were based on the financial statements of the same reporting period which were not reviewed by independent auditors. The balance of these investments accounted for using the equity method amounted to \$1,187,490 and \$1,060,491 as at September 30, 2022 and 2021, respectively, and the comprehensive income recognized from associates accounted for using the equity method amounted to \$46,490, \$28,881, \$101,604 and \$74,697, constituting 17.14%, 18.60%, 15.33% and 13.23% of the consolidated total comprehensive income for the three-month and nine-month periods then ended, respectively.

Qualified Conclusion

Except for the adjustments to the consolidated financial statements, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries and investments accounted for under equity method been reviewed by independent auditors, that we might have become aware of had it not been for the situation described above, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of C SUN MFG. LTD. and subsidiaries as of September 30, 2022 and 2021, and of its consolidated financial performance for the three-month and nine-month periods then ended and its consolidated cash flows for the nine-month periods then ended in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and International Accounting Standard 34, "Interim Financial Reporting" as endorsed by the Financial Supervisory Commission.

Note: In order to repay the existing bank loans and replenish the medium-term working capital, the Company appointed Taipei Fubon Commercial Bank Co., Ltd. to provide a loan amounting to \$500 million with a credit term of five years from the date of first drawdown. The Company has pledged the property (please refer to Note 8 for details) to the management bank as collateral.

According to the abovementioned loan agreement, the Company agreed to provide the consolidated financial statements audited by CPA annually and maintain the following financial ratios and agreements before the full settlement of the debts during the duration of agreement:

- A. Current ratio: Current assets against current liabilities shall be at least 120%.
- B. Debt ratio: Debt against net tangible assets shall be no more than 200%.
- C. Interest coverage ratio: The net profit before tax plus interest expense plus depreciation expense and amortisation expense divided by interest expense shall be at least three times.
- D. Net tangible assets: the net asset value less intangible shall be no less than \$2 billion. As of September 30, 2022, December 31, 2021 and September 30, 2021, the consolidated financial statements of the Group met the requirements of the financial ratio limits.

(15) Pensions

- A. (a) The Company and its domestic subsidiaries have a defined benefit pension plan in accordance with the Labor Standards Act, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Labor Standards Act. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company and its domestic subsidiaries contribute monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company and its domestic subsidiaries would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company and its domestic subsidiaries will make contributions for the deficit by next March.
 - (b) For the aforementioned pension plan, the Group recognized pension costs of \$178, \$178, \$533 and \$533 for the three-month and nine-month periods ended September 30, 2022 and 2021, respectively.
 - (c) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2022 amount to \$9,537.

- B. (a) Effective July 1, 2005, the Company and its domestic subsidiaries have established a defined contribution pension plan (the "New Plan") under the Labor Pension Act (the "Act"), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees' monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.
 - (b) The Group's mainland China subsidiaries have a defined contribution plan. Monthly contributions to an independent fund administered by the government in accordance with the pension regulations in the People's Republic of China (PRC) are based on certain percentage of employees' monthly salaries and wages. The contribution percentage was 10%~20%, respectively. Other than the monthly contributions, the Group has no further obligations.
 - (c) The pension costs under defined contribution pension plans of the Group for the three-month and nine-month periods ended September 30, 2022 and 2021, were \$6,088, \$6,168, \$13,267 and \$12,844, respectively.
- (16) <u>Share-based payment</u> (there was no such transaction as of December 31, 2021 and September 30, 2021)
 - A. For the nine-month period ended September 30, 2022, the Group's share-based payment arrangements were as follows:

		Quantity	Contract

(19) Retained earnings

- A. Under the Company's Articles of Incorporation, the current year's earnings, if any, shall first be used to pay all taxes and offset prior years' operating losses and then 10% of the remaining amount shall be set aside as legal reserve. Stock dividends should be appropriated at a rate of 20% per annum. The remainder, if any, to be retained or to be appropriated shall be resolved by the stockholders at the stockholders' meeting. In accordance with the law, the Company authorised the distributable dividends and bonuses in whole or in part may be paid in cash after a special resolution has been adopted by the Board of Directors; and in addition thereto a report of such distribution shall be submitted to the shareholders' meeting. The aforesaid requirement that resolution shall be resolved at the shareholders' meeting is not applicable.
- B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.

- C. (a) In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.
 - (b) The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Order No. Financial-Supervisory-Securities-Corporate-1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently. Such amounts are reversed upon disposal or reclassified if the assets are investment property of land, and reversed over the use period if the assets are investment property other than land.
- D. The appropriation of 2021 and 2020 earnings had been resolved at the stockholders' meeting on June 9, 2022 and July 8, 2021, respectively. Details are summarized below:

- A. The current year's earnings, if any, shall be distributed a ratio of 1%~9% as employees' compensation in the form of shares or in cash as resolved by the Board of Directors. Qualification requirements of employees include the employees of subsidiaries of the company meeting certain specific requirements. The Company shall distribute directors' remuneration no more than 2.25% of the total distributable amount as resolved by the Board of Directors. The appropriation of employees' compensation and directors' remuneration shall be submitted to the shareholders' meeting.
 - If the Company has accumulated deficit, earnings should be reserved to cover losses and then be appropriated as employees' compensation and directors' remuneration based on the abovementioned ratios.
- B. For the three-month and nine-month periods ended September 30, 2022 and 2021, employees' compensation was accrued at \$2,874, \$2,057, \$6,952 and \$5,916, respectively; while directors' remuneration was accrued at \$6,466, \$4,630, \$15,643 and \$13,312, respectively. The aforementioned amounts were recognised in salary expenses.
 - The employees' compensation and directors' remuneration were estimated and accrued based on 1.1% and 2.48% of distributable profit of current period for the nine-month period ended September 30, 2022.

Employees' compensation and directors' remuneration of 2021 as resolved by the stockholders' meeting in the amounts of \$7,754 and \$17,446, respectively, were in agreement with those amounts recognised in the 2020 financial statements.

Information about employees' compensation and directors' and supervisors' remuneration of the Company as resolved by the Board of Directors will be posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.

(1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet plus net debt.

During the nine-month period ended September 30, 2022, the Group's strategy was to maintain the gearing ratio within reasonable risk level. The gearing ratios at September 30, 2022, December 31, 2021 and September 30, 2021 were as follows:

	September 30, 2022			cember 31, 2021	September 30, 2021

B. Financial risk management policies

- (a) The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. To minimise any adverse effects on the financial performance of the Group, derivative financial instruments, such as foreign exchange forward contracts and foreign currency option contracts are used to hedge certain exchange rate risk, and interest rate swaps are used to fix variable future cash flows. Derivatives are used exclusively for hedging purposes and not as trading or speculative instruments.
- (b) Risk management is carried out by a central treasury department (Group treasury) under policies approved by the Board of Directors. Group treasury identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

Price risk

- i. The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.
- ii. The Group's investments in equity securities comprise shares and open-end funds issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, post-tax profit for the nine-month periods ended September 30, 2022 and 2021 would have increased/decreased by \$1,178 and \$517, respectively, as a result of gains/losses on equity securities classified as at fair value through profit or loss. Other components of equity would have increased/decreased by \$2,789 and \$2,067, respectively.

Cash flow and fair value interest rate risk

The Group's main interest rate risk arises from short-term and certain long-term borrowings with variable rates, which expose the Group to cash flow interest rate risk. Borrowings issued at variable rates expose the Group to cash flow interest rate risk which is partially offset by cash and cash equivalents held at variable rates. Borrowings issued at fixed rates expose the Group to fair value interest rate risk. During the nine-month periods ended September 30, 2022 and 2021, the Group's borrowings at variable rate were denominated in New Taiwan dollars, if the market interest rate had increased by 0.25%, the Company's cash outflow would have increased by \$1,318 and \$1,225, respectively.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms, and the contract cash flows of debt instruments stated at amortised cost.
- ii. The Group manages their credit risk taking into consideration the entire group's concern. For banks and financial institutions, only independently rated parties with a minimum rating of "A" are accepted. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Board of Directors. The utilisation of credit limits is regularly monitored.

- iii. The Group measured actual transaction status. If the contract payments were past based on the term, the default has occurred.
- iv. The Group adopts following assumptions under IFRS 9 to assess whether there has been a significant increase in credit risk on that instrument since initial recognition:

 If the contract payments were past due over 30 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition.
- v. If the credit rating grade of an investment target degrades two scales, there has been a significant increase in credit risk on that instrument since initial recognition.
- vi. The Group used the forecastability to adjust historical and timely information to assess the default possibility of accounts receivable, contract assets and lease payments receivable. As of September 30, 2022, December 31, 2021 and September 30, 2021, respectively, the provision matrix is as follows:

(c) Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities.
- ii. Surplus cash held by the operating entities over and above balance required for working capital management are transferred to the Group treasury. Group treasury invests surplus cash in interest bearing current accounts, time deposits, money market deposits and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient head-room as determined by the above-mentioned forecasts. As at September 30, 2022, December 31, 2021 and September 30, 2021, the Group held money market position of \$____, \$1,057,804 and \$____, respectively, that are expected to readily generate cash inflows for managing liquidity risk.
- iii. The Group has the following undrawn borrowing facilities:

	Septe	ember 30, 2022	Dec	ember 31, 2021	Sept	tember 30, 2021
Fixed rate:

(3) Fair value information

- A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:
 - Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks, beneficiary certificates and convertible bonds is included in Level 1.
 - Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in derivative instruments is include in Level 2.
 - Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in equity investment without active market and investment property is included in Level 3.

- B. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at September 30, 2022, December 31, 2021 and September 30, 2021 is as follows:
 - (a) The related information of natures of the assets and liabilities is as follows:

(b) The methods and assumptions the Group used to measure fair value are as follows:

i. The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	Listed shares	Open-end fund	Convertible bond
Market quoted price	Closing price	Net asset value	Closing price

- ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.
- iii. When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
- iv. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate. Structured interest derivative instruments are measured by using appropriate option pricing models (i.e. Black-Scholes model) or other valuation methods, such as Monte Carlo simulation.

- v. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
- vi. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.
- C. For the nine-month periods ended September 30, 2022 and 2021, there was no transfer between Level 1 and Level 2.
- D. The following chart is the movement of Level 3 for the nine-month periods ended September 30, 2022 and 2021:

E. For the nine-month periods ended September 30, 2022, there was no transfer into or out from Level 3.

- F. Accounting Department segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.
- G. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	2022 technic		Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
