(57) **ABSTRACT**

A resin composition is provided. The resin composition includes a resin mixture, a flame retardant, a spherical silica and a siloxane coupling agent. The resin mixture includes a first resin polymerized by a monomer mixture including styrene, divinylbenzene and ethylene, a second resin including a polyphenylene ether resin modified by bismaleimide, and a SBS resin. The resin composition of the present disclosure can have a high glass transition temperature, a low dielectric constant and a low dissipation factor.
