

What skills has TEOFL study given you?

Inference

Organization

Clarity

Precision

Recovery after mistakes

S 4 What skills has your TOEFL study given you? Well, by now I maintain they have given you competence and confidence in inference, organization, clarity, precision and speed of recovery after making mistakes both on the test and in your daily English use.

Understand meaning	Beyond surface words	
Identify main ideas	Support	Infer
Organize thoughts clearly	Under time pressure	
Recover after confusion	Or mistakes	
Produce clear	Controlled English	

S 5 More importantly, you need to know why your hard earned TOEFL skills still matter. This is what the Shuchu Koza TOEFL course trains you to do in academic level English. Now, you can understand meaning beyond what the surface words tell you. You have the ability to identify main ideas, to support, and infer from information provided. You are now able to organize your thoughts clearly under time and pressure. Equally important, you can recover much more quickly after confusion or mistakes. You can now produce clear, controlled English, not flashy English only meant to impress other people. You have done the hard work and earned these skills.

Isolate these skills

Instead of bundling them

Shorter tasks

Expose weaknesses faster

Adaptive components

Reward consistency

Clarity and accuracy

Matter more

Than endurance

S 6 Now I will explain why these skills are most definitely still essential. The new tasks in the TOEFL iBT isolate these valuable skills instead of bundling them into long and complicated problems sets. The new TOEFL iBT has much shorter tasks that expose your language weaknesses faster. The adaptive parts of the test reward consistent understanding and steady, accurate performance across each section. With these changes, clarity and accuracy matter more than stamina.
