

# GRA-CFS20

121.5cm (47.83 inch)

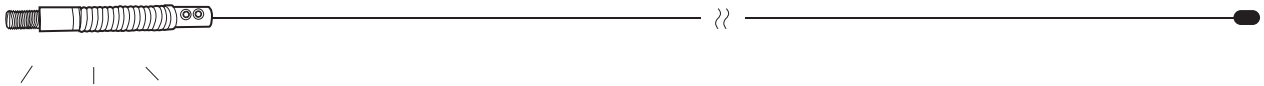

112cm (44.09 inch)

Converts 3/8-24 female whip end to 3/8-24 male thread

And you get a 3/8-24 threaded carbon fiber whip antenna!!!

Note: When the loaded coil of the GRA-CFS20 20 meter band (14.2 MHz) is removed, the whip itself cannot resonate on any frequency. However, you can mount it on other 3/8-24 threaded loaded coils.
