

GRA-CFS10

Converts 3/8-24 female whip end to 3/8-24 male thread

And you get a 3/8-24 threaded carbon fiber whip antenna!!!

Note: When the loaded coil of the GRA-CFS10 10m band (28–29.7 MHz) is removed, the whip itself cannot resonate on any frequency. However, you can mount it on other 3/8-24 threaded loaded coils.
