How far out into space was a question of cosmology, and the answer might depend on which cosmological model was

used to describe the Prime Material plane. We strongly recommend that participants in this unit obtain a copy of both of these texts unless they are already familiar with much of the subject matter and own broadly equivalent books. It seems to speak rather directly about creation, after all. The text is organized as a series of stories, each presenting the history of the field, the observations made and how they fit within the process of science, our current understanding, and what future observations are planned. Though most planes were described by one or more of the cosmological models, there were some exceptions that did not have a clear place in any known cosmology.
